THE venerable Peter Cooper died in New York last week Wednesday. He was born Feb. 12, 1791, and was consequently over 92 years of age at the time of his death. The great object of his life seems to have been how to devote a large portion of his great wealth to the education and elevation of the industrial classes. His noble philanthropy shines brightly by the side of the money kings of the present day who are absorbed wholly in

MICHAEL DAVITT has written a vigrous letter to the young Irish society of Glasgow, in which he says that the dynamite policy can only have the effect of exasperating the English. He declares it would be far better to work and wait for another twenty years than to play into the hands of Ireland's enemies by giving rein to despair and revenge. Michael takes a sensible view of the situation on, which commends itself to all true lovers of liberty. The guillotine and dynamite are not in place in this civilized age, this law and order-lov-

DR. S. F. NEELY, a Democrat, was elected mayor of Leavenworth. He was surported by the Leavenworth Times. The Times seems to brag about its success. Its editor had better go and hide his head. The Times would like to be the leading Republican paper of Kansas, and yet we notice when its editor is not satisfied with the party nominations, he goes over to the Democrats body and soul. No wonder the Republicans thave so much trouble in gaining a foothold in Leavenworth county. Just as long as such disorganizers as the Times persists in the rule or ruin policy, Leavenworth county will be given to the nocrats when the vital interests of the party are at stake.

Two years ago Moore got to gether enough money from his cowboy wages to purchase seven cows and fourteen yearlings. These he branded and put on the range. Then he filed on a section (440 acres) of good school and, within Mathews & Reynolds 50,000-acre pasture, and in return fo his services on the ranch got his horse, board and other expenses, and plenty of time to look after his own. Now his herd has increased to seventyfive head, and a few days ago he offered \$25 per head all round, which he refused. If he holds his cattle it will be but a few years before he is a rich man. The debt of the German Government is small because of the adherence to a strict policy of taxation whereby the current expenses are annually met, but the national burdens are almost unbearably large notwithstanding, mainly because of the cost of the immense standing srmy. Great Britain owes \$3,814,569,960, or \$109.04 per capita, but she is rich enough to stand it for the Present at least, if she is not wise enough to enter upon a statement. for the present at least, if she is not wise enough to enter upon a system of reducing it. The people of the United States grown under the weight of a debt of about \$1,700,000,000, or \$14 per capita, with a country possessing the richest certainties of development of any in the world. Still a debt of even that size is not a thing to be proud of. The smaller it grows the better it looks. The consolation the comparison presents is that we are much better off than our friends scross the water.—Globe-Democrat C. B. Bostwick, editor of the Mattoon.
